Title: CHAINSAW CHAIN FOR CONCRETE

Address to:

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

**37 CFR 1.97(b)**

1.  The Information Disclosure Statement submitted herewith is being filed within three months of the filing of a national application other than a continued prosecution application under 37 CFR 1.53(d); within three months of the date of entry of the national stage as set forth in 37 CFR 1.491 in an international application; before the mailing of a first Office Action on the merits, or before the mailing of a first Office Action after the filing of a request for continued examination under 37 CFR 1.114.

**37 CFR 1.97(c)**

2.  The Information Disclosure Statement submitted herewith is being filed after the period specified in 37 CFR 1.97(b), provided that the Information Disclosure Statement is filed before the mailing date of a Final Action under 37 CFR 1.113, a Notice of Allowance under 37 CFR 1.311, or an Action that otherwise closes prosecution in the application, and is accompanied by one of:

the statement specified in 37 CFR 1.97(e);

**OR**

the fee set forth in 37 CFR 1.17(p).

STATEMENT OF RELEVANCE FOR  
NON-ENGLISH REFERENCES CITED IN PTO-1449

Hon. Commissioner of Patents  
And Trademarks  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

In conjunction with the Information Disclosure Statement, PTO-1449 Form, and copies of references cited therein, we note that two of the references cited and supplied are not in English. To comply with MPEP 609, we provide the following explanation of relevance of these non-English documents.

DE 199 52 979 A1 is a German patent document. We also cite and provide its corresponding U.S. counterpart, U.S. 6,138,658. This is believed to provide an English translation.

EP 1 155 768 A2 is a non-English document which discloses melting processes for applying cutting segments onto the bodies (or stem leaves) of separating disks. In these processes a binding powder that is different from the binding powder used in the

sintering process described above is at first compounded with diamond powder. The binding powder is a metallic powder based on bronze enriched with alloy elements. The diamond powder is thermally resistant and designed for the processing temperatures of around 900°C to be expected. After the production of the mixture of diamond powder and binding powder, it is sprayed onto the body, where it is melted with a pulsed Nd:YAG laser. As a result of the melting process the binding merges with an intermediate layer previously applied onto the body and melts the diamonds firmly into the cutting segment. The melting process generates, compared to the sintering process, bodies with segments with a distinctly elevated service life. (This reference is so described in our specification in the Introduction Section.)

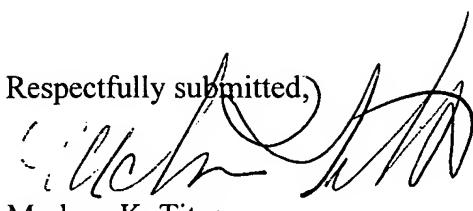

We also provide corresponding EP 1 155 768 B1 with the claims translated into English.

DE 196 20 149 A1 is a German patent document which discloses melting processes for applying cutting segments onto the bodies (or stem leaves) of separating disks. In these processes a binding powder that is different from the binding powder used in the sintering process described above is at first compounded with diamond powder. The binding powder is a metallic powder based on bronze enriched with alloy elements. The diamond powder is thermally resistant and designed for the processing temperatures of around 900°C to be expected. After the production of the mixture of diamond powder and binding powder, it is sprayed onto the body, where it is melted with a pulsed Nd:YAG laser. As a result of the melting process the binding merges with an intermediate layer previously applied onto the body and melts the diamonds firmly into the cutting segment. The melting process generates, compared to the sintering process, bodies with segments with a distinctly elevated service life. (This reference is so described in our specification in the Introduction Section.)

REMARKS

An early and favorable action on the merits is respectfully requested.

Respectfully submitted,
